## 14 FINANCIAL INSTRUMENTS

### Fair value measurement

The fair values of financial assets and financial liabilities are determined as follows:

- (i) the fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices; and
- (ii) the fair values of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

The carrying amount of other financial assets and liabilities carried at amortised cost, approximate their respective fair values due to the relatively short-term nature of these financial instruments.

The following provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable as at 31 March 2017 and 30 September 2017.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active market for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the assets or liability that are not based on observable market data (unobservable inputs).

No analysis is disclosed since the Group has no financial instruments that are measured subsequent to initial recognition at fair value at the end of the reporting period.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Business Review

Revenue for the six months ended 30 September 2017 (“**Six Month Period**”) was approximately HK\$20.34 million, representing a decrease of approximately 5.96% when compared with the same period last year. Loss attributable to owners of the Company for the Six Month Period was approximately HK\$5.08 million whilst for the same period last year, the loss attributable to owners of the Company was approximately HK\$5.46 million.

Given the slow pace of economic recovery along with the continued slackness in the U.S. and European markets, the sales of electronic products have become increasingly challenging. Notwithstanding the challenging market conditions encountered during the Six Month Period under review, the Group continues to provide electronics products and the subcontracting services on PCB assemblies and manufacture of electronic products to customers in its principal markets, i.e. the U.S.A. and the European countries including Belgium, Bulgaria, Denmark, Finland, Germany, Italy, Russia, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

In view of the challenging market conditions as mentioned above, while the Group will continue to focus on its core business of the sales of electronic products, it will explore new business opportunities to broaden its source of income and maximize profit and return for the Group and the shareholders of the Company. The Group will also increase its market share and attract new customers to enlarge its client base through conducting more promotional and marketing activities and designing and developing new electronic products.

### Sales of Electronic Products

Revenue from this segment during the Six Month Period was approximately HK\$20.12 million, representing a decrease of approximately 5.77% when compared with the same period last year. Decrease in sales of electronics products was mainly due to the decrease in the revenue from indent trading of electronic products and manufacturing and trading of electronic products and accessories by approximately HK\$0.60 million and HK\$0.61 million respectively as compared with the corresponding period in 2016. The decrease in the revenue from indent trading of electronic products is mainly attributable to the decreasing purchase orders from the Group’s customers. Such decrease was mainly due to the decrease in sales of fire alarm for the Six Month Period by approximately HK\$1.81 million as compared with the corresponding period in 2016. Decrease in fire alarm was a result of decrease in volume sold, which mainly led to the decrease in the revenue from manufacturing and trading of electronic products and accessories for the Six Month Period.

### Subcontracting income

Revenue from this segment during the Six Month Period was approximately HK\$0.22 million, representing an increase of approximately 8.74% when compared with the same period last year. The increase was mainly due to the increase in orders from providing subcontracting services in the PRC.

## **Financial review**

The Group's revenue for the six months ended 30 September 2017 was approximately HK\$20.34 million, representing a decrease of approximately 5.63% from approximately HK\$21.56 million of the same period in 2016. The decrease in the Group's gross profit margin for the six months ended 30 September 2017 was primarily due to the decrease in sales orders of the higher margin products, namely fire alarm.

Loss attributable to the owners of the Company amounted to approximately HK\$5.08 million for the six months ended 30 September 2017 (approximately HK\$5.46 million for the six months ended 30 September 2016). Loss per share attributable to owners of the Company was approximately HK0.59 cents for the six months ended 30 September 2017 (approximately HK0.68 cents for the six months ended 30 September 2016).

The cash and cash balance increased from approximately HK\$4.62 million as at 31 March 2017 to HK\$13.96 million as at 30 September 2017 mainly due to the net effect of the 160,000,000 placing shares being successfully placed by the Company's placing agent at the placing price of HK\$0.163 per placing share.

As disclosed in the announcement of the Company published on 12 May 2017, the Group's management does not anticipate any substantial increase in purchase orders from its customers for the manufacture and trading of its electronics products and will not expect the demand for the Group's electronics products to exceed the Group's current level of productivity in the coming year(s). Therefore, the Board has decided to dispense with its plans for setting up production facilities for plastic parts and reallocate the relevant funding to other uses.

In this respect, as the current lease of the existing factory building wherein the Group conducts its production is due to expire on 30 June 2017, the Group will relocate its production facilities and plants to a new factory premises with a lower monthly rental. The relocation of the Group's production facilities and plants to the new factory premises requires expenditure. Hence, the Group has reallocated the amount of HK\$1 million from "Setting up production facilities for plastic parts" and the amount of HK\$0.3 million from "Strengthening the Group's position in its established markets and expanding its customer base" to "Working capital and funding for other general corporate purposes", whereby an amount of HK\$0.8 million will be used for the relocation of the Group's production facilities and plants to the new factory premises, an amount of HK\$0.3 million will be used for the refurbishment of accommodation, and an amount of HK\$0.2 million will be used for rental for surface mounting technology facility.
